(1) The land was once fertile, food and fresh water were plentiful, and there were reliable sources of energy. But people took these things for granted and thought they would last forever, and they were wrong. Now food and water are scarce, and there's widespread drought and famine. Supplies of oil and other

natural resources are dwindling (*) fast and countries have been forced to develop nuclear weapons in order to protect what little they have. Conflict has become a way of life.

- (2) This may sound like a Hollywood film scenario, but according to a recent report investigating the impact of climate change, it could really happen in the near future. Environmentalists have long been warning us about the threats of global warming. Now it appears even the US is getting worried. Its report states that rapid climate change would create 'global chaos' and a global environmental catastrophe. As soon as 2020, it is claimed, we could see 'climate wars' caused by catastrophic shortages of water and energy supplies.
- (3)Are such terrible warnings really incredible? Perhaps not, there's evidence that the pace of climate change is accelerating. In Alaska, wintertime temperatures have risen by an average of 6°C, a signal bigger than anything the computer models have predicted. The ice in the Arctic Circle will disappear forever, according to the last predictions, within the next hundred years. Meanwhile, in the Southern hemisphere, one of the seven natural wonders of the world is at risk. The Great Barrier Reef* is one of Australia's top tourist attractions, but it may not be for much longer. The heating is slowly killing the beautiful coral* on the Reef and 95% of it will be dead by the year 2050.
- (4)Change is even taking place in Scotland where winter sports industry is suffering. Two out of five of the Scottish ski resorts are now up for sale due to financial losses caused by the lack of snow in recent years. Is winter' becoming a thing of the past? Global warming may not all be bad news for Scotland, though. It has better summers and the Mediterranean gets too hot, so the Scottish tourism industry should benefit in the summer months.

From Newsreader Articles, May 2004 (adapted)

Glossary:

- * Coral: a marine organism that lives in colonies and has an external skeleton
- * **Reef:** underwater ridge of coral or rock in a body of water, with the top just below or just above the surface

	words). (3.5 marks)					-				_			

with - exciting - online - many - addiction - using - who - rooms - e-mail

- ·········
The amount of time kids spend online is a source of frustration for
many parents. Parents welcomed the internet into their homes, believing they
were opening up anworld of educational opportunities for their
children. However, parents soon realized that, instead of
the internet for homework or research, their kids were spending
hours playing online games, or talking to strangers in chat
Children are shy with their peers are often attracted to
the chances of creating new identities in online communities. Boys in
particular, are frequent users of role-playing games where they
interact other players. However, excessive playing can further
isolate those children from friends and peers.

2-<u>Circle the right alternative</u>. (3 marks)

It was really a catastrophe; the world's (bad - worse - worst) natural disaster had struck Sri Lanka after a massive earthquake in the sea (register - registered - registering) 9° on the Richter scale. It caused an even greater depth of sadness (on - at - in) the country (where - who - which) whole communities were wiped out. It brought (die - dead - death) and destruction. Sri Lanka dominated the world's headlines as people (slept - woke - dreamt) up to view the devastation on their TV screens.

2- Put the bracketed verbs/words in the right tense/from. (3.5marks)

Last month, scientists p	produced a frightening report on global warming.
The 1990s were the (warm)	ten years for one thousand years, they
say. Temperatures (go)	up more quickly in the next century. The
sea will be (high)	than it is now. People in Asia will lose
(they) homes in	n terrible (flooded) Most people
agree that carbon dioxide in	n the air is the biggest problem. It (produce)
when we burn	gas and oil. Recently, 160 countries (meet)
to discuss the pro	oblem, but nothing is decided upon the issue.

WRITING (15 marks)

1- Develop the following hints into meaningful sentences to get a coherent paragraph. (The hints are in order. Just add what is missing) (5 marks)

rs ago
•

2- It's April 22nd, The "Earth Day", your teacher has asked you to write an article in your school magazine in which you sensitize people about the importance of the environment and suggest solutions to save the planet.

Develop this idea into a 10-12 line paragraph. (10 marks)

SAVE OUR BEAUTIFUL PLANET ..!
